DIMENSIONS & WEIGHTS

DIMENSIONS (mm)

Wheelbase (A)	3800	4200	4500
Max length (B)	6672	7077	7932
Max width over wings (cab) (E)	2550	2550	2550
Front axle to back of cab - including filter (F)	580	580	580
Frame height at end of frame, unladen (L)	1207	1207	1211
Frame height at front axle, unladen	1158	1156	1156
Frame height at rear axle, unladen	1195	1196	1195
Front overhang (C)	1440	1440	1440
Rear overhang (D)	1195	1195	1780
Minimum ground clearance (front) (P)	371	371	371
Minimum ground clearance (rear) (Q)	311	311	311
Overall height to top of cab, unladen (K)	3230	3228	3228
Turning diameter kerb to kerb	17200	18400	19300
Turning diameter wall to wall	18800	20000	20900
Front track (M)	1981	1981	1981
Rear track (N)	1827	1827	1827
Approach angle α (°)	33	33	33
Departure angle β (°)	16	16	11
Ramp angle γ (°)	26	23	22
Side members thickness	7,7	7,7	7,7
Side members max height	304,4	304,4	304,4
Side members flange width	80	80	80
Frame width at rear	771,4	771,4	771,4

WEIGHTS (KG)

Wheelbase	3800	4200	4500
Total vehicle kerb weight	7828	7854	7946
Kerbweight on Front Axle	5341	5418	5427
Kerbweight on Rear Axle	2487	2436	2519
G.V.W. (EC)	18000	18000	18000
G.V.W. (Design)	20000	20000	20000
Plated weight on front axle (EC)	8000	8000	8000
Plated weight on front axle (Design)	8000	8000	8000
Plated weight on rear axle(s) (EC)	11500	11500	11500
Plated weight on rear axle(s) (Design)	13000	13000	13000
Max body & payload (Design)	12172	12146	12054

Notes :

Weights are to standard configuration and include: chassis cab (or tractor), driver (75 kg), full fuel and Adblue tanks, tools kit and spare wheel (if present). The values of the plated weights / GVW can vary according to the markets and local homologations.

Wheelbase	Type	Drawing
3800	Left hand drive	5803030907
4200	Left hand drive	5803030908
4500	Left hand drive	5803030909

MODEL COMPONENTS

ENGINE

Identification Code	F3HGE61 I
Manufacturer	FPT Industrial
Commercial name	Cursor 13
Cycle	DIESEL
Injection type	DIRECT
4 Stroke / 2 Stroke cycle	4
No. of cylinders	6
Cylinders layout	IN-LINE
Bore mm	135
Stroke mm	150
Total displacement cm ³	12.882
Exhaust gas treatment	syencer
Weight (without oil / water) Kg	1230
Injection system	Common rail
Cold starting type	THERMOSTARTER
Emissions control	EURO III
Cooling system	water

ENGINE EMISSION EURO III opt. 06044

430 C13 - Cursor 13 - 430 CV - WG

Maximum power: 316 kW (430 HP) @ 1900 rpm

Maximum torque: 214 Kgm (2100 Nm) @ 1100 rpm

The central electronic system controls the following functions: Engine preheating, fuel preheating, turbo, injection control, engine brake, control of engine speed and torque, data exchange OBD with ScanTool, engine diagnostic (onandoff-board), control of blink-code and failure indicator light on dashboard, control of engine idling speed and max. engine speed, data exchange with VCM (vehiclecontrol module), supervision of emission values.

REAR AXLE RATIO

Option code	05003	06017	06019 *	06021	06034	06036
Ratio	6.09	4.23	4.67	5.01	5.56	6.57

*: Standard axle ratio

PERFORMANCE

* Max Speed. Calculated speed on the basis of engine rpm and axle ratios. Real speed limits must take into account the speed index of the tyres: K = 110 km / h L = 120 km / h M = 130 km / h

** Theoretically calculated values, arising from the engine torque without considering the road-friction values and the stability limits of the vehicles. When calculating with more than one tyres or more than one axle ratio, availability of each combination must be checked.

Speed and gradeability values are rounded.

A = Total Weights (solo vehicle) Kg - Max Gradeability %

B = Total Weights (vehicle+trailer) Kg - Max Gradeability %

Tyre: 20081 - 13R22.5 TYRES - Regional / Works **Efficiency: 0.91** **Off road slow**

FRONT BUMPER

Steel front bumper

DISC BRAKES

DUO DUPLEX drum brake
Electronic braking system (EBS)

Front axle
Drum brakes 410 mm (410 x 180)
Friction area: 2884 cm²

Tandem
Drum brakes 410 mm (410 x 200)
Friction area: 3220 cm²

SUSPENSIONS

Front parabolic suspension STD
Standard capacity: 8.000 kg. (options for 8.500 kg and 9.000 kg.)

Rear semi elliptic parabolic suspension STD
Capacity: 13.000 kg.

AXLES

Position	Description
Front	5985/2D - Drive a. H.R. (Drum br. D.D.)
Rear	451391/2D - Rear axle H.R. (Drum brake 2D)

TRANSFER BOX

Type

Model	TC 2200
OFF ROAD Low Ratio	1.6
ON ROAD Normal Ratio	1

BATTERY

Electrics

Voltage V	24
Alternator power V/A	28 / 90
Starter power kW	5.5
No. of batteries	2
Batteries capacity V/Ah	12 / 170

390L FUEL TANK

Fuelling

Capacity (l.)	390
Material	Aluminium

MODEL COMPONENTS

MISCELLANEOUS

THE AVAILABILITY OF THE FOLLOWING OPTIONS DEPENDS ON VERSIONS AND MARKETS :

SAFETY :

TPMS (on cluster): Tyre Pressure Monitoring System is an electronic system which monitors the air pressure inside a tyre and provides information on faults in real time to the driver. In addition to improving vehicle safety, **TPMS** helps the driver plan tyre maintenance and contributes to reducing fuel consumption.

ESP: Electronic Stability Program (ESP).

The **ESP** system acts in skidding phase, by adjusting the engine power and braking on individual wheels with different intensities so as to stabilise the position of the vehicle. It is effective both in case of sudden deviations from the trajectory and in correcting situations of oversteer or understeer, which may occur in case of incorrectly approaching a bend.

LDWS: Lane Departure Warning System

(LDWS). The Lane Departure Warning System beeps when the vehicle strays from the lines that mark the driving lane without the indicators being activated. The system is very effective in preventing accidents due to distraction or sleepiness.

FUEL CONSUMPTION OPTIMIZATION:

ECOSWITCH: Designed to reduce fuel consumption, **ECOSWITCH** is an important aid for the driver. It activates the "iEco program" in order to optimise gear shifting strategy and performance according to actual vehicle weight, assuring the best productivity under any operating condition.

ECO ROLL: On all type of incline (also on moderate one), the eco-roll function serves to open the driveline and retain the kinetic energy of the vehicle for longer or to slightly increase it by reducing the engine-drag torque that affects the impellers. If the vehicle subsequently slows down, the engine must increase the injected fuel quantity at a later point. Driver actions during an active rolling function such as accelerator pedal, brake actuation, changing to manual, or speed range selector actuation lead to the termination of the rolling function and the closing of the driveline. Depending upon the speed range, the last gear before the rolling phase can be engaged or a new gear can be calculated and engaged when the rolling function is terminated.

ECO ROLL works in the range (50km/h ; 92km/h) and is independent from Cruise Control setting.

GPS-PREDICTIVE DRIVING (OPT Code 78878)

GPS-predictive driving is the driving strategy implemented in TraXon with predictive functionality to determine the optimal gear early for any driving situation, according to the electronic horizon information acquired via GPS by a provider and made available on the CAN bus. The electronic horizon acquires the current location of the vehicle via GPS and determines the route from topographical street maps (uphill gradient, curves, max permissible speed). GPS-predictive driving is used to improve the gear shifting and Eco-rolling strategy.

DRIVEABILITY :

ROCKING MODE (OPT Code 78507) TRAXON provides a Rocking function to have the clutch reating directly to accelerator pedal movements for rocking the vehicle out of a depression in the terrain in low grip conditions. When the Rocking mode is activated, it is possible to disengage the clutch immediately by releasing the accelerator pedal, roll back the vehicle and engage the clutch immediately again by depressing the accelerator pedal. The HMI provided for the Rocking mode includes: a dedicated switch to let the driver activate / deactivate the Rocking mode. A specific indication on the Instrument Cluster to inform when the Rocking function is active ("ROCK" indication in the transmission modes area).

OFF-ROAD MODE is an high mobility function with which the gearshifting logic allows higher rpms before shifting to faster gears, thus providing higher engine power and torque.

CREEPING MODE is an high mobility function with which the vehicle moves forward at minimum speed, simply by releasing the service brake pedal, useful for precise maneuvering operations at low speed (active via Quick Menu).
